

TIECHE

ENGINEERED SYSTEMS

TIECHE Engineered Systems (TIECHE Inc), a California based firm provides innovative and cost efficient solutions for Facilities an Energy Management. We specialize in Building Automation & Control Systems, Energy Management Systems, Power Monitoring & Sub-metering, Intelligent Alarming Systems and People Counting Solutions in a wide range of industries.

SECOWEB combines innovation with intuition to provide the most user friendly and cost efficient Facilities Management Solution.

Total Facility Care

SECOWEB combines state of the art hardware and software components to provide a comprehensive and cost efficient Facilities Management Solution

- Real Time Control & Monitoring
- Intelligent Alarm Reporting
- Dynamic System Graphics
- Real Time Asset Management
- Network Data Sharing & Control
- Enhanced Data Logging & Trending
- TCP/IP Based System Architecture
- Program Trace Elements
- Third Party Equipment Integration

Web Based Front End

SECOWEB web server combines simple to use dynamic front end graphics with industry leading real time tools. Using its built-in XML IP capability, SECOWEB can communicate on Wide Area Networks (WAN), which are connected over Intranets or Internet.

Strength in Numbers

Designed to integrate multiple ECOM-12 IP Control Modules into a single front-end, the SECOWEB offers the ends user maximum value-add by offering all the features of other complex front ends in a cost efficient and user friendly package.

Enhanced Energy Efficiency

SECOWEBs Enhanced Energy Efficiency (E3) module leverages its Advanced Reporting feature to allocate, analyze and present data in an organized and informative way through easy to use & easy to configure actionable energy reports.
